EDUCATION AND TRAINING

University of Montenegro – Faculty of Natural Sciences and Mathematics

25/09/2017 – 22/08/2022

Bachelor of Science (BSc) in Information Technology and Computing

 Podgorica, Montenegro

Information technology and computer science, including programming, software development, databases, computer networks, operating systems, and algorithms.

Practical and theoretical skills in designing, developing, testing, and maintaining software applications, as well as basic system analysis and problem solving.

Ability to apply modern development tools and methodologies, work with technical documentation, and understand fundamental principles of information systems and digital technologies.

Hide details 

Level in EQF: **EQF level 6**

University of Mediteran – Faculty of Information Technology

21/11/2022 – Current

Master of Science (MSc) in Software Engineering |  Podgorica, Montenegro

Advanced software engineering concepts, including software architecture, system design, quality assurance, and web application development.

Strong focus on software testing methodologies, performance and security testing of web applications, and analysis of system reliability and efficiency.

Practical experience in project management, teamwork, and the use of collaborative and project management tools within software development processes.

Applied work with artificial intelligence technologies and methodologies, as well as academic research activities, including writing and presenting technical and scientific papers.

Currently preparing a Master's thesis focused on web application testing, with emphasis on performance metrics and security evaluation.

Achieved a high academic performance with a grade point average above 9.5.

Level in EQF: **EQF level 7**

Cisco Networking Academy

02/11/2020 – 30/11/2020

Certificate of Course Completion – Introduction to Cybersecurity |

 Online, Montenegro

Fundamental concepts of cybersecurity, including global implications of cyber threats and common network vulnerabilities.

Understanding of cyber-attack types, their impact on industries, and basic principles of threat detection and defense.

Introduction to network security concepts, cybersecurity career paths, and opportunities for further professional certification in the field of information security.

Hide details ^

Level in EQF: **EQF level 4**

Cisco Networking Academy (in collaboration with Network Development Group – NDG)

01/10/2020 – 30/10/2020

Certificate of Course Completion – NDG Linux Unhatched |  Online, Montenegro

Fundamental Linux operating system concepts, including basic command-line usage, file system navigation, and user and permission management.

Understanding of core Linux principles relevant to IT support and system administration, aligned with knowledge covered by the CompTIA A+ certification.

Awareness of Linux system roles in modern IT environments and preparation for further professional certifications such as Linux Essentials, LPIC-1, and CompTIA Linux+.

Level in EQF: **EQF level 5**

WORK EXPERIENCE

Web Center |  Podgorica, Montenegro

Software developer

01/02/2021 – 15/09/2025

Development and maintenance of web applications using modern JavaScript frameworks and libraries, including React, Next.js, Nuxt.js, and Gatsby.

Backend development and integration using Laravel, as well as working with databases for data storage and management.

Collaboration within an agile development environment, using tools such as Jira for task tracking and project coordination.

Deployment and file management using FTP tools (FileZilla), versioned workflows, and coordination with designers and other developers to deliver functional and scalable web solutions.

Noubis |  Podgorica, Montenegro

Software developer

01/04/2022 – 01/10/2022

Development and maintenance of full-stack web applications using modern frontend and backend technologies.

Leadership of a small development team, including task coordination, technical guidance, and support of team members throughout the development lifecycle.

Direct communication with clients to gather requirements, clarify technical details, provide progress updates, and ensure alignment between business needs and technical implementation.

Collaboration within cross-functional and agile teams, contributing to planning, implementation, testing, and delivery of client-oriented digital solutions.

Participation in code reviews, troubleshooting, and optimisation of existing features to ensure application reliability, performance, and maintainability.

SETVI |  Podgorica (Remote) , Montenegro

Software developer

03/10/2022 – Current

Development and enhancement of the company's AI-driven revenue enablement and sales acceleration platform used by major manufacturing and distribution clients across multiple industries.

Implementation of advanced AI-powered features such as intelligent product recommendations, sales insights, and automated analytics to improve platform performance and customer outcomes.

Full-stack application development, including frontend features, backend integrations, APIs, and scalable data workflows, while ensuring alignment with client requirements and industry standards.

Leadership and coordination of a small development team, including task distribution, technical guidance, and code review processes to maintain high quality deliverables.

Direct communication with clients and stakeholders to gather requirements, present progress, clarify technical decisions, and ensure optimal implementation of solutions tailored to enterprise-level needs.

Freelance |  Podgorica (Remote), Montenegro

Software developer

22/01/2018 – 01/02/2021

Freelance development of web-based solutions for small STEAM-oriented projects, including the design and implementation of different types of websites and web applications.

Applied problem-solving and algorithmic thinking, including work on cryptographic and logic-based algorithms within experimental and educational projects.

Participation in hackathon-based development, contributing to the design and implementation of a digital solution for the labour market, which achieved **3rd place** in a competitive innovation environment.

End-to-end project work, including requirement analysis, technical implementation, testing, and delivery of functional prototypes and proof-of-concept solutions.

SKILLS

Good listener and communicator | programming, software engineering, software development |

Microsoft Office | Microsoft Excel | Instagram | Microsoft Powerpoint | Google Drive |

Zoom | Team-work oriented | Organizational and planning skills | Microsoft Word

Personal & Transferable Skills

Problem solving | Time management | Adaptability | Decision-making | Responsibility |

Continuous learning | think analytically

Project Management & Teamwork

Coordinate teams | Team leadership | Work in multidisciplinary teams |

Project management | Agile project management (Scrum / Kanban) | Task prioritisation

LANGUAGE SKILLS

Mother tongue(s)

Montenegrin

Other language(s)

	Listening	Reading	Spoken interaction	Spoken production	Writing
English	C1: Proficient user
